the environmental **ASPECTS**

CARE FOR OUR HOME

The resort is the first and only hotel in the Maldives to be certified by EarthCheck as well as Green Globe Gold certified for its sustainable and eco- friendly practices. A commitment to driving environmental and sustainable initiatives to limit our footprint on the environment, including:

- Identifying environmental risks, monitoring and preserving the pristine house reef just 50 metres from shore
- Providing awareness and education to local school children about coral reef ecosystems
- Implementing single- use plastic and waste management systems
- All excursions are conducted without any plastic bottles or disposals and bento boxes are used to transport food and glass bottles for water
- Fish that do not meet the minimum length or are a protected species are released during fishing excursions
- Making own compost from food waste collection for sustainable gardening practices

BOTTLING PLANT

At Hadahaa, all of our drinking water comes from our desalination plant. We produce the water and bottle it in our reusable glass water bottles for guests and staff throughout the resort. This helps us keep waste out of landfills and reduces our carbon footprint on the environment.

HELPING THE COMMUNITY

In our efforts to promote sustainability and contribute to the livelihood of the local community, we support the initiatives of the neighbouring island, Kondey, only a 15- minutes boat ride away.

Kondey is an agriculture island, boasting of small- hold vegetables and fruit plantation, fishing and farming where the produce is distributed to local nearby islands. Kondey's focus on producing responsible and sustainable products, without the use of chemicals is indeed inline with Park Hyatt Maldives Hadahaa's sustainable vision and we take pride in doing our part for the environment and the community through our collaboration.

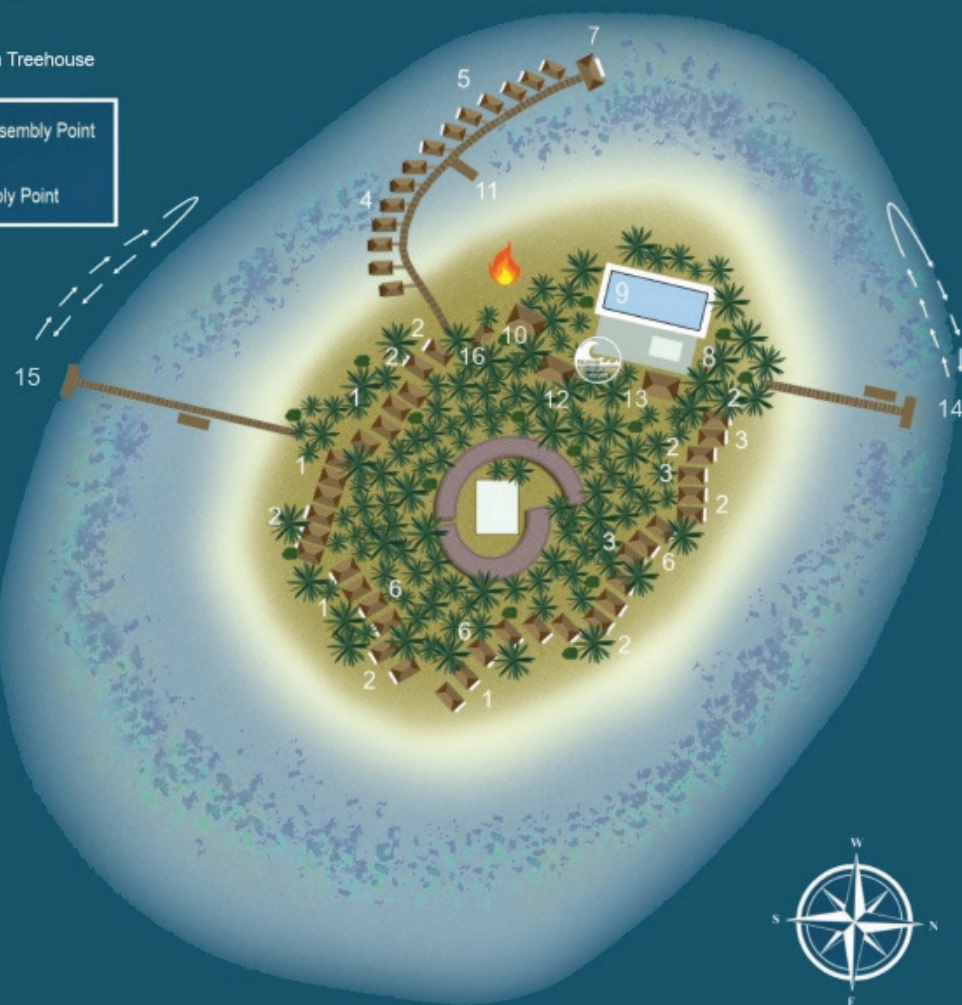

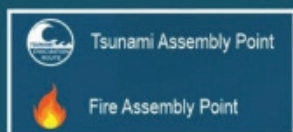

FOOD WASTE COMPOSTING

With a considerable quantity of waste generated every single day, it becomes crucial to manage waste effectively. In our collective effort to uphold and improve sustainable practices, and because reducing food waste isn't always easy, we have put in place an Environment-Friendly Organic Food waste composting machine; where the amount of organic waste that ends up being processed each day is a waste that can be put to good use, helping to make a great source of fertiliser for our very own chef's garden.
